

MOBOTIX MASK DETECTION BUNDLE

READY NOW

Ensure your facility can monitor compliance with your Return-to-Work policies including wearing face masks in public and common areas. As companies open up and employees return to work, there are new protocols and policies in place to add a layer of safety to the workplace. At Konica Minolta, we understand your safety concerns; we want to make incorporating our intelligent MOBOTIX cameras with Mask Detection Software – easy and affordable.

You may already know of the unparalleled images our reliable, German-built, indoor/outdoor video surveillance cameras provide and the intelligent security features you gain when you have a MOBOTIX camera security network. This bundle, however, gives you even more flexibility to implement your return-to-work strategy with video alerts based on established standard operation procedures for visitors and employees. If face masks are required and absent, you automatically receive an alert.

WHAT YOU NEED TO KNOW

We have created a mask detection bundle with our MOBOTIX MOVE VandalDome VD-2-IR Indoor/Outdoor Camera, SecurOS™ mask detection software via Intelligent Security Systems (ISS) VMS and optional KMPF three-to five-year financing. These cameras are easily installed in a drop-ceiling or drywall, and connected to the network via a shared Power over Ethernet (PoE) switch.

With the ISS mask detection video solution, you can address your ‘new normal’ as you navigate through corporate policy, state requirements and employee safety considerations. The software uses advanced neural network algorithms to detect the person’s face in the scene, and then, check if they are wearing a mask as they enter your facility. Since face masks have become required in many public locations, property owners must be prepared to ensure everyone wears their mask throughout the day and reduce exposure to viruses.

Custom alerts can be created and SMS or screen pop-ups can be created displaying the person’s info

Adds an additional layer of protection to any security protocol

Analytic is added easily to any existing MOBOTIX system and the user interface is simple to use

Will work with most existing IP cameras and can be augmented with MOBOTIX cameras

Face Mask Detection VMS can live side-by-side with existing VMS platforms or become the main VMS

Event-to-Video Evidence Linking – All detections are linked to corresponding video clips and can easily be played back from the user interface

MOBOTIX MOVE

These conventional, centrally managed cameras are thoroughly weatherproof, high-quality IP cameras equipped with the latest standard features of centralized video systems, such as integrated infrared lighting, automatic day/night switching with a mechanical IR blocking filter, Wide Dynamic Range and High Speed PTZ.

WHY IS THIS EASY

We take the guess-work out of finding the camera and software to meet your needs. Depending on your facility, you can include 2 to 20 MOBOTIX VandalDome VD1A-2-IR. Move cameras in your personalized bundle.

YOUR RESPONSIBILITY

- Camera Installation
- Power over Ethernet (PoE) switch
- Network Installation
- Outbound (WAN) Internet Access
- Allow Remote Configuration (Cameras & Server)

KONICA MINOLTA PROVIDES

MOBOTIX MOVE VandalDome VD1A-2-IR camera(s) including:
