

KYOCERA
ACCUSENDER
FAX

FAX SCANNED DOCUMENTS **SIMPLY** AND **SECURELY.**

ELIMINATE TIME-CONSUMING **MANUAL** FAXING.

KYOCERA ACCUSENDER FAX ENABLES USERS TO **EASILY SEND** SCANNED DOCUMENTS OF ANY SIZE VIA **SECURE FAX** FROM SELECT KYOCERA MFPS WITH THE **SENDER'S NAME** INSTEAD OF A GENERIC DEVICE NAME.

Despite the increased use of digital technology, vertical markets such as healthcare, manufacturing and financial services are still heavily dependent upon fax technology as part of their processes. While fax is a necessary requirement, standalone equipment and supplies are costly, and the transmission process is time-consuming. Moving from manual faxing to an e-mail fax solution represents one of the most cost-effective, productivity-enhancing improvements available to organizations in fax-intensive industries.

KYOCERA AccuSender Fax is a business application that enables users to send scanned documents as faxes directly from their Kyocera MFP. Through integration with most popular fax servers on the market, users simply scan a hardcopy document or select one from stored archives, configure it as an attachment to an e-mail message, and use the recipient's fax number as the e-mail address. The fax server translates the attachment, which is then processed as an incoming fax by the recipient's fax machine.

AccuSender Fax is a simple, cost-effective way to add increased functionality to select Kyocera MFPS as well as eliminate the security risks associated with stand-alone fax machines and unsecured e-mail communications.

WITH KYOCERA ACCUSENDER FAX, SENDING FAX FILES IS FAST AND EASY!

- › Configure sending preferences on the MFP's control panel
- › Enter the recipient's fax number as the destination address
- › Scan and send your documents

It's that simple!

Users can add destinations manually by entering the number at the MFP keypad.

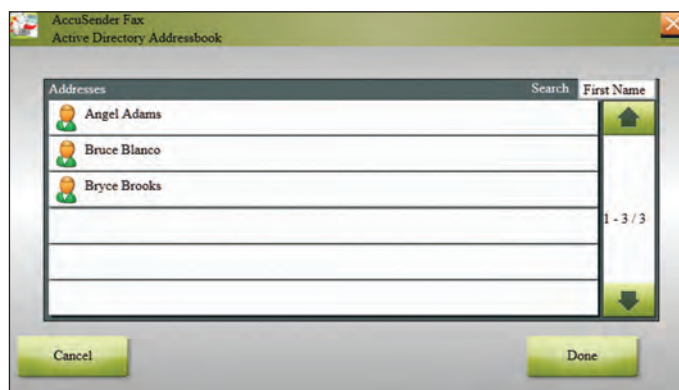

KYOCERA ACCUSENDER FAX

HyPAS®

Kyocera's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. It enhances your MFP's core capabilities, integrates seamlessly with all widely accepted software applications, and enhances your specific document imaging processes. With HyPAS, you'll share more information, optimize your resources, and streamline your document workflows.

AccuSender Fax offers many user-defined scan options.

AccuSender Fax address book feature allows faxing to multiple destinations with ease.

ACCUSENDER FAX BENEFITS

Organizations face increasing pressure to improve employee productivity and reduce operating costs. Regardless of the size of your business, the AccuSender Fax application meets these challenges by integrating with your organization's existing fax and document distribution applications.

- › View sender's name, rather than a generic account number, when receiving faxes.
- › Increase compliance by retaining a full audit trail and archive of all sent fax communications.
- › Lower costs by reducing paper, phone lines, modems, stand alone fax machines and related supplies.
- › Aid with compliance by providing a secure place for managing document distribution and delivery.
- › Reduce the need for time-consuming manual faxing.
- › Enables customers to utilize cloud fax servers.

SYSTEM REQUIREMENTS

- › LDAP Authentication protocols supported: NTLM v2 and Kerberos
