KYOCERA
**ACCUSENDER®
POWERED BY
BISCOM**

SAFELY E-MAIL LARGE SCANNED DOCUMENTS.

SECURELY SHARE FILES WITHOUT SIZE LIMITATIONS.

ACCUSENDER POWERED BY BISCOM IS ANOTHER WAY KYOCERA TAKES THE CAPABILITIES OF ITS MFPs UP A LEVEL, ENABLING BUSINESSES TO DO MORE WITHOUT INVESTING IN ADDITIONAL HARDWARE.

Electronic file sharing is common practice among most businesses today. However, many email servers have size restrictions for sending and receiving email, causing loss of employee productivity when sending large hardcopy files and potential delivery failure. As a result, companies are implementing complicated, time-consuming, and costly ways to get those sizeable files to their destination, such as scanning the hardcopy file to a shared folder, uploading it to a third party cloud, and then sharing that file with the intended recipient. KYOCERA's AccuSender powered by Biscom business application effectively addresses this issue by allowing users to scan and send those documents quickly and easily with no size limitation from their KYOCERA MFP. And it all happens through one intuitive application, using Biscom Secure File Transfer, E-mail, or Fax.

Utilizing Biscom's Secure File Transfer* (SFT) private cloud or on-premise solution, KYOCERA's AccuSender can save companies valuable time and money when sharing hardcopy files. It also offers an elevated level of security for those customers in highly regulated industries by enabling their confidential documents to stay within the protected confines of their own firewalls until securely downloaded by the recipient. In addition, AccuSender powered by Biscom ensures document security is a priority by utilizing the National Institute of Standards and Technology's FIPS 140-2 certified AES 256-bit encryption algorithm.

*A Biscom SFT account is required

THE BENEFITS OF KYOCERA ACCUSENDER POWERED BY BISCOM
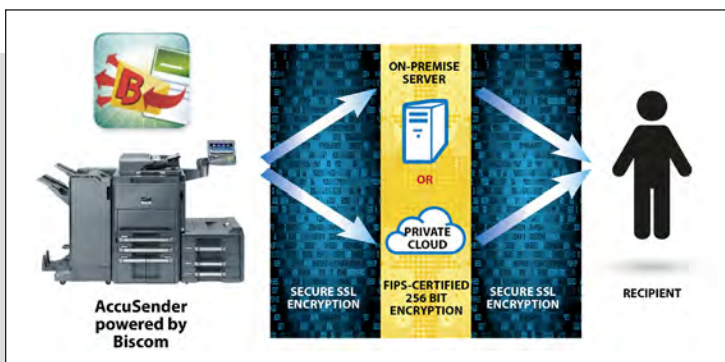

HANDLES YOUR LARGEST FILES
› Scalable, flexible and secure handling of files size 100GB or larger

FILES ARE SECURE AND PROTECTED AT ALL TIMES
› Highly secure SSL encrypted transfer of scanned documents safeguards confidential information in transit, while government FIPS certified 256-bit encryption protects files at rest in the cloud or on-premise server

SIMPLE AND SEAMLESS, IT WORKS LIKE YOU DO
› Barcode routing sheets generated directly from the MFP by the user streamline workflows
› Document stamping, including Bates stamping, addresses court compliance requirements

› Flexible send option allows the selection between an LDAP look-up, recent e-mail, fax destinations or send-to-self
› Convenient presets such as the ability to add cover pages at the control panel

Anti-virus integration	YES	YES	No	YES

SYSTEM REQUIREMENTS
› Supported file format for print and scan: PDF
› Resolution: 200 dpi, 300 dpi, 400 dpi
› Supported language: English

ABOUT BISCOM
Biscom, the leader in secure enterprise document delivery, provides scalable and reliable document delivery and file sharing through secure cloud and on-premise solutions. Extensive reporting and auditing capabilities, robust FIPS certified encryption and security technologies, helps organizations meet their most challenging file delivery and collaboration needs.

Getting started with AccuSender is easy. Contact your authorized KYOCERA dealer. They will work with you to design a total document solution tailored specifically for your organization.

E-MAIL AND FAX
In addition to the Biscom SFT connection, AccuSender also provides alternative solutions for sending large files. Users whose recipients require files to be sent via e-mail, but don't require secure transfer, can select AccuSender's e-mail option. The file will be automatically split into smaller pieces that meet the size requirements set by the administrator, and then e-mailed to the recipient. AccuSender's fax option allows users to send files using their existing fax server**. They can send to multiple recipients at once as well as select a cover page for the file.

BRINGING EASE AND SECURITY TO INDUSTRIES THAT REQUIRE IT
Organizations in highly regulated industries such as Legal, Healthcare, Finance, and Government are all too familiar with the potential costs of unsecured documents. Regulatory, contractual, and legal requirements can make sharing documents a worrisome task. AccuSender powered by Biscom allows administrators in these industries to feel confident with their file sharing solution by meeting their unique needs such as:

- FIPS certified at-rest encryption for HIPPA and SOX compliance
- Local court requirements such as Bates Stamping and PDF-A
- User defined ability to control access to confidential documents

HOW IT WORKS
1. After selecting the AccuSender icon on the KYOCERA MFP panel, users simply choose one of the following delivery methods:

- Biscom Secure File Transfer - Login is required
- E-mail - The file will be split into smaller sections in order to accommodate email server file size limitations
- Fax - The file will be sent through the customer's fax server**

2. Choose between "Manual" or "Barcode" destination routing:

- If "Barcode" is selected, the document can be scanned and sent
- If "Manual" is selected, the user enters the recipient(s)' e-mail address or fax number, selects the document settings (cover page, stamping, password, etc.), and then scans/sends the document. The user also has the option of printing out a barcode routing sheet to further streamline repeat jobs using the same settings.

**AccuSender supports most common fax servers.
